

FLUXAXIS

Massivit 1800

For large format 3D printing. We're one of only a handful of specialist 3D printing companies able to offer this super-sized machine as part of our in-house bureau service. This printer enables items to be 3D printed at remarkable size and speed.

What can this technology do for you? The print medium is a translucent fire-retardant acrylic that can readily be finished to achieve creative designs for all manner of applications including advertising, point of sale, experiential marketing, theatre prop making and entertainment.

Large form prints in a matter of hours.

The Massivit 1800 offers an unprecedented printing speed, scale and versatile print materials. The two printer heads print independently, meaning two different parts can be produced simultaneously.

This printer has a huge 1500 x 1200 x 1800 mm build chamber and with a print speed of up to 300 mm/sec and a Z axis speed of up to 35cm /13.7" per hour, large format prints can be ready within a matter of hours.

Ideal for Visual Merchandising

This machine can print items up to 1500 x 1200 x 1800 mm in one piece. The translucent nature of the print medium also makes prints ideal for internal illumination, helping create out-of-this-world displays and pioneering visual merchandising.

From theatre props and branded items, themed spaces and experiential environments to 3D lightboxes and eye-catching signage. The possibilities are endless!

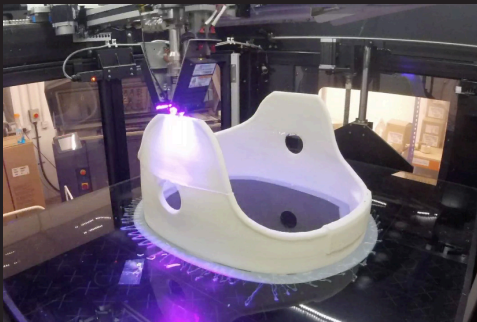

Applications for this technology include:

Visual merchandising, branding, retail, F&B, commercial, theatre, signage, events.

High quality finishing

We can also offer an end-to-end service, our specialist Finishing Team providing a range of high-quality dyes, paints and scenic finishes.
